# Top Trends in HPC

## **2013 declined overall – by \$800 million**

- For a total of \$10.3 billion
- Mainly due to a few very large systems sales in 2012, that weren't repeated in 2013
- We are in the process of updating our forecasts forecasting – we expect healthy growth in 2014 to 2018

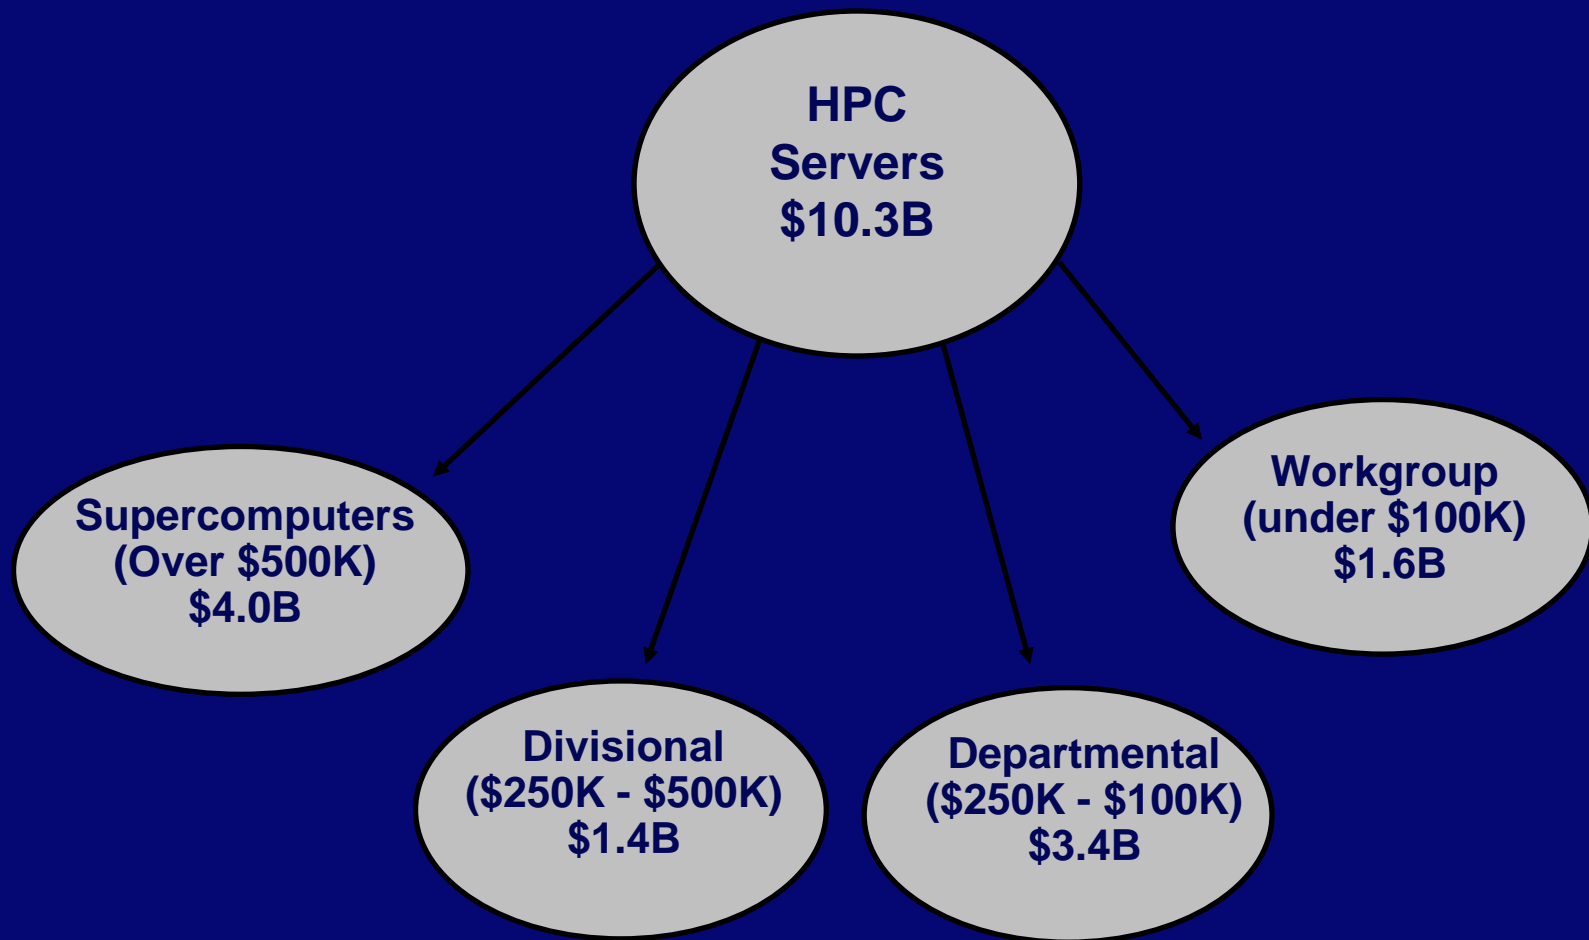

## **Software issues continue to grow**

**The worldwide Petascale Race is in full speed**

**GPUs and accelerators are hot new technologies**

**Big data combined with HPC is creating new solutions in new areas**
